

PA-W (Portable Axle Weighing Scale)

Ultra-low, hard aluminum alloy pad, integrated design

High strength, good repeatability

Antirust, insterting-in and pulling-out seamless connection, waterproof

Automatically distinguish vehicle axle model, check if vehicle is overloaded or not automatically

Humanized software and hardware design

With high grade aluminum suitcase, metallic painted, portable

Specifications:

Model	PA-W				
Max Capability (Single Axle)	5t	10t	15t	20t	30t
Platform size(LxWxH)	700x430x30(mm)		800x430x30(mm)		
Ramp dimension	700x350(mm)		800x350 (mm)		
Display division	0.5kg, 1kg, 2kg, 5kg, 10kg, 20kg, 50kg				
Weighing accuracy(static)	±0.05%				
Dynamic	±2%				
Safe overload	150% F.S.				
Inspecting speed	≤10km/h				
Load cell structure	Pad is load cell, strain gauge inside				
Cable Length	One set includes 2 weighing pads; cable length is 10m and 8m,but longer cable is optional				
Work Temperature	-45℃~+70℃				

PA-W (Portable Axle Weighing Scale)

Field use:
