

## Truck scale (Weighbridge)

---

SCS series of all-electronic truck scale is the development of our company's latest product, reasonable structure design, advanced technology, adapted to mass production, stable and reliable quality, won the trust of the majority of users, the industry has been weighing the title of quality products. The whole car with a value system stable and reliable high-precision sensors and intelligent weighing instrument display. Instrumentation with high sensitivity, high resolution, the software feature-rich, stable and reliable work, weighing instrument data interface standard for printer output records can also be connected with the computer component of weight management system. scale structure of the car value for Science, U-rugged steel platform. Can be used without foundation or a shallow pit in the form of installation, commissioning and maintenance is simple to install, less the cost of infrastructure investment, is highly welcomed by the majority of users

SCS series of all-electronic truck scale applies to ports, airports, mining, metallurgy, materials, storage, as well as factories and enterprises in the bulk load of goods vehicles weighing measures.
